

Francisco Beccaria

FRONTEND DEVELOPER

3+ years of experience in diverse projects spanning industries like finance, e-commerce, and more. Focused on delivering product-driven solutions while collaborating closely with clients, stakeholders, and product managers. Skilled in working with various frontend technologies and adaptable to different project requirements.

KEY SKILLS

- **HTML:** Semantic Markup, Accessibility, SEO
- **CSS:** TailwindCSS, Sass, BEM, Responsive Design, shadcn/ui
- **JavaScript:** React.js, Next.js, TypeScript, Redux, Context, React Query

Additionally, I have experience working with Storybook, ESLint + Prettier, Firebase, Vanilla JavaScript, Ruby on Rails with StimulusJS, Shopify Themes and Astro.js.

PROFESSIONAL EXPERIENCE

Frontend Developer at Koombea, Colombia

Mar 2021 - Present

I mainly work with technologies such as **NextJS, ReactJS, and StimulusJS**. I am involved in a **diverse range of projects**: business analytics, administrative management, marketplaces, and e-commerce.

I collaborate effectively with **cross-functional teams**, including working alongside Project Managers and Product Owners (utilizing Jira), Product Designers (using Figma), Backend Developers (APIs built in Ruby on Rails), DevOps (mainly AWS), Tech Leaders, and QA Engineers.

I introduced **NextJS**, marking the first time it was used in the company, transitioning from ReactJS and optimizing with static page generation. This significantly improved performance and load times, resulting in **positive client feedback**.

I maintain **daily contact with clients**, building strong trust with key stakeholders to ensure consistent project execution and timely delivery. I've worked closely with clients from the **US and Latin America**.

I regularly make **decisions about design, product, and technical aspects** in small teams, aiming for the best results. I've also led frontend projects independently, making critical decisions when facing tight deadlines.

EDUCATION

Electromechanical Technician at Instituto La Salle, Florida

Mar 2015 - Dec 2018

Focused on electrical installations, fixing circuits, and maintaining systems. Learned electrical theory and worked with both home and industrial systems.
